Name David C. Smith

Proctorville Ohio

David C. Smith is the inventor of the SolarAttic Space Heater. The space heater was originally called the Bright Day Solar Heater. The above testimonial is his. The following testimonials in the form of a small questionnaire were taken by David in late 1993. Some of these reflect systems that have been online for 8-10 years and demonstrate the effectiveness of the system and its maintenance free operation.

Could you estimate your savings in percentage? 25%

What is your primary source of heat - (gas) electric, oil, coal.

Are you pleased with unit? YES

Have you had any maintenance problems? NO

Comments Several yrs back my husband was out of work for couple of yrs. We turned our gas furnace off and relied on wood burning stove & our Bright Day Solar unit. At this time it was more than 25% saving. When we have family gatherings in fall/winter/spring and the house gets too hot from all the cooking w/comping in, we
